Member Information

LOGIN INFORMATION: Just a reminder that we are now using an automated system to process renewal as well as new memberships.

Please take the time to visit your Country Coach Club Website at www.countrycoachclub.com and login to your account.

To login, simply enter your eMail address as the user name and then enter your password. If you have forgotten your password or are new to the site, you will need a new password. Use the password reset link that you will find on the login page and you will be sent a new password.

TO EMAIL THE CLUB: See Officer Contact List, page 2 (yellow box) for email address.

TO MAIL DUES, ETC, TO THE CLUB: See Officer Contact List, page 2, (yellow box) for CCI mailing address. When you pay online your dues are processed immediately. Due to physical mail and handling expect it to take 20 to 30 days if you are paying by check.”

TO PHONE THE CLUB: See Officer Contact List (page 2), select the appropriate Officer and phone that person.

Please help us keep your membership up to date, by logging in and checking to ensure your membership is current and that we have all of your current contact information.

WHO ARE WE?

CCI is a non-profit organization, 501(c)(7), centered on Fun and Fellowship. The Club was founded in 1984 and is a Chapter of the Family Motorcoach Association (FMCA).

WHAT WE DO

The Purpose of the Country Coach Club is to: provide a community for all Country Coach motorcoach owners to exchange information, provide opportunities for fun and fellowship, support CCI and FMCA activities such as rallies and FMCA conventions, provide a common communication and resource link for CCI members and to help our fellow Country Coachers.

EDITORIAL POLICY

The CCI eNewsletter is published monthly, online by Country Coach International. The eNewsletter Editor is Debbie Glenn, who can be contacted by calling 325-669-6840 or online - VPPublications@countrycoachclub.com. The Editor reserves the right to edit, shorten, or modify any material submitted.

Reproduction of ON the ROAD AGAIN in whole or in part, including photocopy, except for personal use, is prohibited without the expressed written permission of the Publisher. CCI is not responsible for any liability arising from errors, omissions, mistakes or products/service found in the eNewsletter. Readers should proceed cautiously, especially with respect to technical information.

Reports to Members

From your President

PRESIDENT

Bill Sax

Hi CCI!

Things are going great. Our membership numbers are up & the club is going strong. We are contributing our growth to our Facebook presence. We have a number of groups, Country Coach International (2,100 members), Country Coach Owners Group (2,300 members), Country Coach Motorhomes for sale (1,200 members) plus a couple others. It seems people find us on Facebook then join the club. However, it happens we are doing well.

Our Arcadia rally in January was one of our most attended rallies with 35 coaches. It caught us by surprise, normally we have numbers in the teens or low 20's considering everyone is firmly ensconced in the snowbird spot. Not this time. Our rally coordinator, Tammy Toalson, adjusted well and the rally was a great success. We had a number of vendors present, great food & comradery. Plus, a great music night supplied by new members Steve & Lyn Lail.

On a personal note, Rita & I spent most of the Winter in Florida as usual, but decided to see what Arizona is like. So, we packed up and left mid-February for the west. We did a leisurely trip stopping for short 2 or 3 day stays in campgrounds and taking advantage of Harvest Host for one-night stops. We spent a week in the Texas Hill Country getting to enjoy both balmy days and cold rainy ones..... We ended up visiting our eldest grandson, a US Marine, at 29 Palms California for over a week.

Next, we are onto Tucson for the FMCA International Rally & then to Benson, AZ for another CCI Rally. If you're attending the FMCA rally, come by and visit us at the "Chapter Fair" March 22nd or the "Chapter Block Party" March 24th (details will be in the FMCA program).

As always, we'll be CCing you on the road!!!!

Bill

Technical Article - De-Winterizing Tips

Compiled from the Country Coach Tech Topics site by Mike Cebula

De-Winterizing Tips

by Dennis Wasserburger (CC Service Department)

If your coach was stored outside, a complete and thorough exterior wash and interior cleaning will be required. The holding tanks (fresh water, black water, and gray water) and the entire plumbing system should be thoroughly flushed to remove any of the RV type plumbing anti-freeze you should have installed for winter storage. This should be completed prior to hooking up your icemaker water feed line or filling your water heater. Even though this type of RV plumbing anti-freeze is not deadly to drink (so they say), the taste is terrible and should be removed from your fresh water supply.

Consider changing your potable water filter cartridge at this time (prior to refilling the potable water distribution system). The filter can be accessed from the driver's side compartment immediately forward of the plumbing bay. There is an access cover on the aft bulkhead. Once removed, the filter housing is exposed. By unscrewing the lower section of the filter housing, you gain access to the filter cartridge. This new filter should be adequate for full seasonal usage.

Batteries – Chassis and house batteries (liquid type) should be topped off to the proper level with distilled water and fully charged.

Tires - Tire pressure should be adjusted to the proper cold inflation pressures for the weight of your loaded coach.

Engine Coolant - Engine coolant must be at the proper level in the surge/overflow tank with a 50/50 mixture of anti-freeze and water. This is a good time to take a small sample of coolant from your cooling system to your engine manufacturer and have it checked for the correct pH and cooling system additives.

Engine Oil & Filter - The engine oil and filter should have been changed when you put your coach in storage. If you didn't complete this task then, shame on you. If you did, a quick check of the oil level is all that is needed at this time.

De-Winterizing Tips - Continued

Engine Belts & Hoses - Check for the proper belt tension, and any sign of cracked or deteriorated hoses. Replace as required.

Windshield Washer - The windshield washer reservoir should be filled and tested for proper operation before your first trip.

Diesel Fuel - Your diesel fuel tank should be full from your previous winter storage, so now all that is required is to drive, and start having fun. Stock up your food supplies and necessary clothing and head for your favorite vacation spots for the season. As you can see, the precautions you took to put your coach in storage for the winter have really paid off in the de-winterizing process for summer travel.

PS. If you have been enjoying the warmer climates over the winter months and are preparing to head back home, let me remind you that you should check tire pressure and fluid levels (diesel fuel, engine oil, hydraulic oil, coolant, LP Gas, windshield washer solution, and battery water) before heading out. As noted in your User's Guide, these items should be checked on a daily basis when traveling.

It's **2021**
and you deserve a break.

Upcoming CCI Rally Information

Rallies are just one of the reasons to join Country Coach International but as CCI rally coordinator I think they are the BEST reason!

Join us at Spring Gulch RV Resort in beautiful New Holland, PA. We will arrive on July 15th and depart on July 22nd, 2022. We plan to venture out to see all Lancaster County has to offer. Spend some time in the Amish Farmlands, explore the antique trains and enjoy a ride through the Pennsylvania countryside. Drive through the Welsh Mountains of Pennsylvania Dutch Country and shop in the city of Lancaster. We will round out the week with a visit to the “sweetest place on earth”, Hershey, PA.

Cajun Country is calling! Cajun Palms RV Resort in Breaux Bridge, LA is hosting our club. Plan on arriving on Oct 17th and departing on Oct 24th, 2022, for a week of fun. Cajun Palms Resort is conveniently located between Lafayette and Baton Rouge and close to Henderson, Louisiana, Cajun Palms RV Resort provides a great rally destination! Henderson is well known for its Cajun culture and it's legendary Cajun cooking and crawfish. This area hosts a number of popular restaurants, shops and swamp tours.

You won't be wasting away if you join us at Margaritaville RV Resort, Auburndale, FL! We will arrive on Jan 23rd and depart on Jan 30th, 2023 after a glorious week in “warm” central Florida. The resort is located an hour southwest of Orlando and just outside of Lakeland, Florida. Historic and quaint Auburndale is one of Central Florida's smaller cities, but it definitely has a lot to offer. Great seafood, shopping and all of the amenities you would expect to find.

All three of these resorts have planned activities and entertainment that we may enjoy during our stay. As always, we will have food, fun and fellowship. We will make plenty of time for those all-important tech talks as well as other coach related activities.

If you have questions, comments or suggestions, feel free to give me a call or email!

Tammy Toalson

850-966-5758 or VPRallyCoordinator@CountryCoachClub.com

Technical Bulletin - A/C Charging

Contributed by Dennis Holmes

1. Remove the dust caps from the service valves, if using the DIY recharge kit you may leave the high side (red) covered.
2. Start the engine and set the A/C system to maximum cooling.
3. If using the DIY recharge kit install a can onto the dispenser and use the piercing needle to puncture the top of the can to allow the refrigerant to exit the can. Connect the dispenser to the low side (smaller) valve. Squeeze the trigger to dispense refrigerant into the system. This may take some time so be patient. If the low pressure switch is not allowing the compressor to engage it will be particularly slow. You may need to allow 10 minutes per can to get it all to empty into the system. Once the pressure builds up enough so that the switch allows the compressor to engage this process will go faster.
4. If using the two gauge service kit install a can onto the can adaptor on the center hose and screw down the piercing needle to puncture the can. If you are using a larger volume tank connect it to the center hose instead. Open the low side valve to allow refrigerant to enter the system. Again, this may take some time as well. If you are using disposable cans and need to swap cans close the low side petcock while swapping cans.

Never open the high side (larger) valve when charging the system or else the high pressure will back feed into the can and can cause it to explode. The high side valve is only used for purging the system moisture with a vacuum pump.

5. When using disposable cans keep them upright so that gas will be expelled. If you invert them liquid Freon will be expelled which can create excessive pressure in the compressor head, potentially damaging the compressor.

Technical Bulletin - A/C Charging

6. When the low pressure gauge (or the only gauge if using the DIY dispenser) reads between 25 and 40 PSI stop adding any more refrigerant. Adding excess refrigerant will not improve the cooling and will only damage your system.
7. Once you think you are pretty close shut down the system and allow the pressures and temperatures to equalize. Using the above temperature-pressure chart you should be able to see if you have the proper charge level.
8. The final test is to check the temperature differential between the incoming air and output air. If your system is performing as designed the Delta T should be around 20 degrees.

Important Information on the Pennsylvania Rally

Registration is open for the rally in New Holland, PA July 15 to 22, 2022. There are a few things about this rally that are different.

1. Longer rally. The club decided to go with a 7-night rally. We did this for a few different reasons. The rate for the campground is better. There is so much to do in the area. The extra time will give us a more relaxed rally with more time to visit, have tech talks and to venture out on your own. The rate for 7 nights full hook ups is \$554. I know this is pricey, but this is the going rate for the area and cheaper than the per night rally rate.

2. Camping included. The campground required us to put up a deposit or individually book all the sites by mid-February. The club decided rather than rush everyone to make their reservations so early that we would put up the deposit. This translates to you paying for your camping with your rally fee.

3. Same great value. As always, the rally fee for this rally will be \$150 per member and \$200 per non-member but when you register you will be paying for 7 nights camping (\$554) as well as the rally fee.

4. No need to call the campground. We will be working with the campground for your site reservations. If you have specific requirements (i.e., handicap), then let me know.

5. Hard deadlines! The deadline for registering for this rally is June 15th. The deadline for cancelling is also June 15th. Registrations cancelled after June 15th may not be eligible for refund due to prepaid costs for the rally. Rally reservations cancelled before the deadline will incur deductions for non-refundable items (i.e., credit card fees, prepaid fees).

6. Limited availability. We were only able to book 30 sites. There will be a waitlist started when/if those 30 are booked. Those on the waitlist will be offered any spots created by cancellations.

7. You must pay when you register. As stated above, refunds will be available up to the deadline but due to the limited number of sites and the club being responsible for the site fees, we must require you to pay when you register.

Technical Bulletin - Kwikkee Automatic Steps

With minimal periodic maintenance Kwikkee automatic electric steps will provide years of trouble-free operation.

Kwikkee recommends lubricating all the moving parts (bearing, pivot points, slides, clevis pin and drive linkage ball) every 30 days with a good quality moisture and heat resistant penetrating grease, such as KwikLube®.

Silicone and WD40 are not recommended. They tend to evaporate and dry the mating surfaces, leaving them more vulnerable to the elements.

Check and clean all electrical connections. Water and electricity just don't mix. Verify that you have clean, dry connections at the four-way and two-way plugs. Water can sometimes seep into these connections and corrode the connection or wick up the wires into the control unit causing a short circuit. A small dab of di-electric grease in the plugs is a good preventative measure.

Also check any butt connections present on any of the wires leading from the four-way plug. Corrosion in any of these can result in malfunction. If you find bad connections, cut the wire back, restrip, and reconnect it with a crimp style, heat-shrink automotive connector.

A good clean ground is critical. The green ground wire coming from the step control unit to the chassis must be connected firmly to a clean non-painted surface. Periodically remove and clean the ground. Scrape the chassis surface down to bare metal and reattach the ground wire with a machine screw, internal-tooth lock washer, and a nut (coarse threaded sheet metal screws are not recommended for attaching the ground connection).

Trouble shooting your step made easy. For do-it-yourselfers, Kwikkee makes a KwikTest tool that allows one person to perform several diagnostic tests. With it you can pinpoint problems in about 10 minutes. The tester checks all control unit functions, power switch function, ignition override feature, last-out feature, light circuit, and door switch circuit.
